## ROCKY-ICHIMARU to Exhibit at IRMRA 2023

ROCKY-ICHIMARU Co., Ltd. (Headquarters: Chikugo-shi, Fukuoka; President and CEO: Hironobu Ichimaru) will exhibit at IRMRA's 24th Rubber Conference & Expo 2023, one of the tire industry conferences and exhibitions to be held at the Chennai Trade Centre in Chennai, India, from September 21 to 23.

Since our founding in 1978, we have contributed to solving our customers' problems through equipment improvement and product development based on our purpose of "Contribute to the realization of a sustainable society by pushing forward the evolution & innovation of manufacturing". Through this exhibition, we aim to increase awareness of our company and our business in the Indian market, build customer engagement, and promote sales expansion activities.

## ■ Description of exhibits

### Angle seat type 2-way piston valve

#### SWC series

Socket welding angle seat type valve having the same sealing structure with our TPC 2/3-way series which has been reliable throughout a long years of field proven performance in nitrogen curing.

\*This product is scheduled to be launched during FY2023.

### New type “Panel Unit” (RPU)

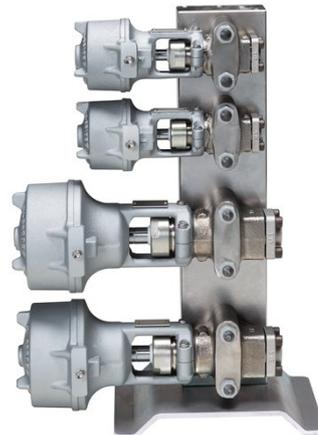

An integrated manifold piping package system which consists of several valve bodies by adopting actuator of SWC series. The size becomes smaller than conventional panel unit.

\*This product is scheduled to be launched during FY2023.

### Conventional “Panel Unit” (RPU)

An integrated manifold piping package system, using our own proprietary connection method (panel type), that can separate valve and manifold.
